

Oat & Raisin Cookie

Baking Instructions

1. Take out from the freezer and arrange on the tray to defrost (can take from 30 min-1h), make sure you keep sufficient space between each cookie to expand during baking. Do not mix different types of cookies on the same tray.
2. **Set the oven for 160°C.**
3. Gently press the cookie down with your hand to help spreading during baking.
4. **Bake cookies for 16 mins.**
5. When ready the cookie should have nice golden brown edges, with a little crust formed but still be soft in the middle. Add more time in the oven if necessary, but make sure not to over-bake.
6. Leave to cool down completely for 10 minutes and gently remove from the tray with a spatula.
